Article Writing Prompts

12 SEO Blog Posts for UBIS Global
ABD & Masters Transfer Pathways

Copy each prompt block and paste it into your AI writing tool.
Each prompt is self-contained with tone, structure, keywords, and linking instructions.

ubisglobal.com

Global Instructions (Apply to Every Article)

Before You Start

Every article must follow these rules. Do not repeat them in each prompt — they apply to all 12 articles.

tone & voice

Write in a professional, empathetic, and authoritative tone. The reader is a working professional who is stressed, overwhelmed, or frustrated. Speak to them like a trusted advisor — not a salesperson. Use "you" and "your" throughout. Avoid academic jargon. Short sentences. Short paragraphs (2-3 sentences max). Use bullet points and numbered lists liberally.

UBIS BRAND RULES

When mentioning UBIS, always use "UBIS Global" on first reference, then "UBIS" thereafter. UBIS is headquartered in Washington DC, IACBE-accredited (CHEA-recognized), 100% online, 8-week terms, ~9 entry dates per year, 40+ nationalities. Never say "under \$10,000" for the ABD program — instead say "from \$800 per track" or "typically under \$9,000 total." For masters, say "from under \$2,700" and "transfer up to 70% of credits." Never use exclamation marks in body copy. Never use emojis.

SEO RULES

Include the target keyword in: the H1 title, the first 100 words, at least one H2 heading, and naturally 3-5 more times throughout. Use related keywords and synonyms naturally. Write a meta title (max 60 characters) and meta description (max 155 characters) at the top of each article. Use H2 and H3 headings to structure content — no H4 or deeper.

LINKING RULES

Every article must include at least 2 contextual links to the relevant UBIS landing page. Link anchor text should be natural (e.g., "UBIS ABD dissertation pathway" not "click here"). Also include 1 internal link to ubisglobal.com main site. If the article is for the ABD page, link to the ABD landing page. If for the Masters page, link to the Masters landing page.

CALL TO ACTION

End every article with a soft CTA paragraph. Do not be salesy. Example: "If you're ready to explore your options, UBIS offers a free credit evaluation so you can see exactly what transfers and what you'll pay — before you commit." Always link the CTA to the relevant landing page.

FORMATTING

Output in clean HTML with H1, H2, H3 tags. Use `<p>` for paragraphs, `<ul>/<ol>` for lists, `<strong>` for emphasis. No inline CSS. No images (they'll be added later). Include the meta title and description as HTML comments at the top of the output.

Month 1-2: Foundation Content

Article 1: ABD to Doctorate — Your Complete Guide

2,000 words · [Links to ABD page](#)

META TITLE: ABD to Doctorate: Complete Guide to Finishing Your Dissertation (2026)

META DESCRIPTION: ABD and stuck? Learn exactly how to go from all-but-dissertation to doctorate. Structured pathways, credit transfer, timelines, and costs explained.

FULL PROMPT — COPY EVERYTHING BELOW

Write a comprehensive 2,000-word blog post titled "ABD to Doctorate: Your Complete Guide to Finishing the Dissertation You Started."

Target keyword: `ABD to doctorate` . Secondary keywords: `ABD completion program` , `finish dissertation` , `all but dissertation` .

Structure the article as follows:

H2: What Does ABD Mean? — Define ABD (All But Dissertation). Explain that it means coursework is done but the dissertation remains. Note that 76% of ABD candidates never finish. Normalize the experience — it's common and it's not a failure.

H2: Why Do So Many Doctoral Candidates Get Stuck at ABD? — Cover the main reasons: advisor departure, loss of motivation, life events (job change, family, health), isolation, lack of structure, funding running out. Be empathetic. This section should make the reader feel understood.

H2: Your Options When You're ABD — Present 3 paths: (1) Go back to your original school, (2) Transfer to a new program that accepts ABD candidates, (3) Abandon the degree. Be honest about the pros and cons of each. Position option 2 as the most realistic for most people.

H2: How to Transfer Your ABD Status to a New Program — Explain the process: transcript evaluation, prior learning assessment, advanced standing credits. Mention that some programs accept up to 40 credits of advanced standing. Explain that the key is finding a program that admits you directly to the dissertation phase without repeating coursework.

H2: What to Look for in an ABD Completion Program — Cover: structured dissertation tracks (not open-ended), rotating faculty mentorship (not one advisor who might disappear), online format for flexibility, transparent pricing per track, IACBE or equivalent accreditation, weekly or frequent intakes (don't wait months to start).

H2: How the UBIS ABD Dissertation Pathway Works — Describe UBIS specifically: 4 structured tracks at \$800 each (Proposal, Literature Review, Research & Analysis, Write-Up & Defense), rotating faculty from institutions like Harvard, Stanford, Oxford, Wharton, Georgetown. Up to 40 credits advanced standing. ~1 year completion. Include a link to the UBIS ABD landing page with anchor text like "UBIS ABD dissertation pathway."

H2: Timeline: How Long Does It Take to Go From ABD to Doctorate? — Give a realistic timeline. With a structured program: 10-14 months is typical. Break it down by phase. Compare to the alternative (going back to your original school, which could take years more).

H2: Cost: What Does It Actually Cost to Finish? — Be transparent. Dissertation tracks at \$800 each = \$3,200. Plus program and enrollment fees. Total typically under \$9,000. Compare to the cost of a full DBA (\$35,000-\$45,000). Frame it as: you already paid for the coursework — don't pay for it again.

H2: Next Steps — Actionable advice: gather your transcripts, request a free credit evaluation, compare programs, talk to an admissions advisor. Include a soft CTA linking to the UBIS ABD landing page.

Write in a professional, empathetic tone. Short paragraphs. Use bullet points where helpful. Address the reader as "you." Include the target keyword in the first 100 words, in at least one H2, and naturally 3-5 more times. Output in clean HTML.

Article 2: How Many Credits Can You Transfer for a Masters?

1,800 words · [Links to Masters page](#)

META TITLE: How Many Credits Can You Transfer for a Masters Degree? (2026 Guide)

META DESCRIPTION: How many credits can you transfer to a masters program? Learn the limits, policies, and how to maximize your transfer at UBIS Global (up to 70%).

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,800-word blog post titled "How Many Credits Can You Transfer for a Masters Degree? A 2026 Guide."

Target keyword: `how many credits can I transfer masters` . Secondary keywords: `transfer masters credits` , `graduate credit transfer` , `masters credit transfer policy` .

Structure:

H2: The Short Answer — Open with a direct answer: most universities accept 25-33% transfer, but some accept up to 70%. UBIS accepts up to 70%. This immediately gives the reader what they came for.

H2: How Masters Credit Transfer Works — Explain the basics: credits must be from an accredited institution, grade of B or better, relevant to the program, evaluated course-by-course. Mention that policies vary widely between schools.

H2: Typical Transfer Limits by Program Type — Create a comparison table (in HTML): MBA 36-credit programs (typically 6 credits / 2 courses max), MBA 45-credit programs (typically 9 credits / 3 courses max), MA/MS programs (varies, often 12 credits). Then show UBIS: up to 70% (25-31 credits on a 45-credit program, 25 credits on a 36-credit program).

H2: What Credits Qualify for Transfer? — Cover: graduate-level courses from accredited US universities, international graduate credits (with equivalency evaluation), professional experience (some programs offer PLA credits — UBIS offers up to 6 credits for 5+ years managerial experience), military credits. Note that undergraduate credits generally don't transfer to graduate programs.

H2: How to Maximize Your Credit Transfer — Actionable tips: (1) Choose a program with the highest transfer ceiling, (2) Get an official transcript evaluation before enrolling, (3) Don't assume — ask specifically about each course, (4) Consider professional experience credits, (5) Look at net cost to finish, not sticker price.

H2: Transfer Credit Comparison: UBIS vs. Other Universities — Table comparing: UBIS (70%, from ~\$2,700 out-of-pocket), Liberty (50%), Walden (~40%), Capella (~25%), typical public online (25-33%). Make UBIS clearly stand out.

H2: How to Request a Credit Evaluation — Step-by-step: gather transcripts, submit to the university, wait for evaluation (typically 1-2 weeks), review the evaluation, ask questions, make your decision. Mention that UBIS offers free credit evaluations. Link to the UBIS Masters landing page with anchor text like "UBIS free credit evaluation."

H2: Frequently Asked Questions — Answer 4-5 quick questions: Can I transfer credits from an unaccredited school? (Generally no.) Do credits expire? (Varies — UBIS doesn't impose time limits on relevant graduate credits.) Can I transfer credits from a different field? (Must be relevant/equivalent.) What if my credits don't transfer? (You only pay for what remains.)

End with a soft CTA linking to the UBIS Masters landing page. Write in clear, direct language. Use tables and bullet points. Output in clean HTML.

Article 3: 7 Strategies to Finish Your Dissertation

2,200 words · [Links to ABD page](#)

META TITLE: 7 Strategies to Finish Your Dissertation When You're Stuck (2026)

META DESCRIPTION: Stuck on your dissertation? These 7 proven strategies help ABD doctoral candidates finally finish. Structured support, accountability, and faculty guidance.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 2,200-word blog post titled "7 Strategies to Finish Your Dissertation When You're Stuck."

Target keyword: `how to finish a dissertation` . Secondary keywords: `dissertation help` , `finish my dissertation` , `dissertation completion` .

Structure:

Introduction — Acknowledge the reader's situation. They're ABD. They've been stuck. It's not their fault — dissertation work is isolating and unstructured. Promise 7 concrete strategies.

H2: Strategy 1 — Break It Into Structured Phases — Explain why open-ended dissertations fail. The solution: break the dissertation into defined phases with clear deliverables. Example: Proposal → Literature Review → Methodology → Analysis → Write-Up → Defense. Each phase has a deadline and a faculty checkpoint. Mention that UBIS uses a 4-track structured model. Link to UBIS ABD page.

H2: Strategy 2 — Get a New Advisor (or Multiple) — If your original advisor left, retired, or became unavailable, you need replacement support. But don't rely on just one person. Explain the rotating faculty model — different experts for different phases. This prevents the "single point of failure" problem.

H2: Strategy 3 — Set Weekly Milestones (Not Monthly) — Monthly goals are too vague. Weekly milestones create accountability. Give examples: "This week: draft 3 pages of literature review." "This week: finalize research questions with advisor." Recommend writing 500-1,000 words per week minimum.

H2: Strategy 4 — Join a Dissertation Support Community — Isolation kills momentum. Options: university writing groups, online ABD communities, structured cohort programs. Mention that UBIS places students in a supported environment with faculty and peers.

H2: Strategy 5 — Use the "Ugly First Draft" Method — Perfectionism is the #1 dissertation killer. Explain the concept: write a terrible first draft on purpose. You can't edit a blank page. Get words on paper, then refine. Give a practical framework: 30-minute daily writing sessions, no editing allowed during the session.

H2: Strategy 6 — Transfer to a Program That Meets You Where You Are — If your current school isn't working, leaving is not failure — it's strategy. Explain how ABD credit transfer works. Some programs accept up to 40 credits of advanced standing and admit you directly to the dissertation phase. Link to UBIS ABD page with anchor text about the ABD pathway.

H2: Strategy 7 — Hire Accountability (Not Just Editing) — Most ABD candidates don't need an editor — they need accountability. Explain the difference: an editor fixes your writing; an accountability partner ensures you write. Dissertation coaches, structured programs with milestone tracking, and faculty mentors who check in weekly all serve this role.

H2: Putting It All Together — Summarize the 7 strategies as a checklist. Encourage the reader to pick 2-3 to implement this week. End with a soft CTA about UBIS's structured ABD pathway. Link to the ABD landing page.

Write with empathy and authority. The reader is frustrated — don't talk down to them. Use short paragraphs, bullet points, and bold text for scannability. Output in clean HTML.

Article 4: Fastest Way to Finish Your Masters in 2026

1,800 words · [Links to Masters page](#)

META TITLE: The Fastest Way to Finish Your Masters Degree in 2026

META DESCRIPTION: Want to finish your masters fast? Learn how to complete your degree in as few as 8 weeks by transferring up to 70% of your credits and taking 3 concurrent courses.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,800-word blog post titled "The Fastest Way to Finish Your Masters Degree in 2026."

Target keyword: `finish masters degree fast` . Secondary keywords:

`fastest way to get a masters` , `accelerated masters program` ,
`complete my masters online` .

Structure:

Introduction — Working professionals don't have 2 years to finish a masters. They need speed without sacrificing credibility. Set up the premise: the fastest path isn't about finding a "fast" program — it's about not repeating work you've already done.

H2: The #1 Speed Hack: Transfer Your Existing Credits — Explain that most people don't realize they can transfer graduate credits. Industry norm is 25-33%, but some programs accept up to 70%. With maximum transfer, you might only need 3 courses. That's the real accelerator.

H2: How Credit Transfer Works for Masters Programs — Brief explanation: accredited graduate courses, B grade or better, relevant to program, evaluated individually. Mention that international credits also qualify at some schools. Link to UBIS Masters page with anchor text about credit transfer.

H2: Take Multiple Courses at Once — Most programs limit you to 1-2 courses per term. But some allow 3 concurrent courses in an 8-week term. If you only have 3 courses left (after transfer), you can finish in a single 8-week term. This is the fastest possible path.

H2: Choose 8-Week Terms Over 16-Week Semesters — Explain the difference. Traditional semesters = 16 weeks, 2 per year. 8-week terms = ~9 start dates per year. You can start sooner and finish sooner. No waiting for "fall semester."

H2: Online Programs Are Inherently Faster — No commute, no scheduling conflicts with work, study on your schedule. Online programs also tend to have more frequent intakes and flexible pacing.

H2: The UBIS Fast-Track Model — Describe specifically: transfer up to 70% of credits, take 3 courses concurrently in one 8-week term, finish in as few as 8 weeks total. From under \$2,700 out-of-pocket with maximum transfer. Weekly intakes. IACBE-accredited. Link to UBIS Masters landing page.

H2: Realistic Timeline Scenarios — Create 3 scenarios in a table: (1) Maximum transfer (70%) → 3 courses → 8 weeks. (2) Moderate transfer (50%) → 5-6 courses → 2-3 months. (3) Minimal transfer (25%) → 8-9 courses → 4-6 months. This helps readers self-identify.

H2: What to Do Next — Actionable steps: gather transcripts, get a free credit evaluation, calculate your remaining courses, choose a program with the highest transfer ceiling and most frequent intakes. Soft CTA linking to UBIS Masters page.

Write in an energetic but professional tone. The reader wants speed — match that energy without being hype-y. Use tables, bullet points, and bold numbers. Output in clean HTML.

Month 3-4: Authority Content

Article 5: When Your Dissertation Advisor Leaves

1,500 words · [Links to ABD page](#)

META TITLE: When Your Dissertation Advisor Leaves: What to Do Next

META DESCRIPTION: Your dissertation advisor retired, moved, or became unavailable. Here's exactly what to do when you're ABD and lose your faculty support.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,500-word blog post titled "When Your Dissertation Advisor Leaves: What to Do Next."

Target keyword: `dissertation help for doctoral students` . Secondary keywords:

`lost my dissertation advisor` , `ABD no advisor` , `dissertation mentor` .

Structure:

Introduction — Open with the scenario: you've been working on your dissertation for months or years, and suddenly your advisor retires, takes a new job, goes on sabbatical, or simply stops responding. You're ABD and now you're alone. Validate how stressful this is.

H2: Why This Happens More Than You Think — Statistics and reasons: faculty turnover, retirement waves, sabbaticals, advisors taking on too many students, funding cuts. Normalize it — this is a systemic problem, not your fault.

H2: Your Immediate Next Steps — Action list: (1) Don't panic and don't quit. (2) Contact your department chair or graduate coordinator immediately. (3) Ask about the school's advisor reassignment policy. (4) Document where you are in the process (what's done, what's pending). (5) Keep writing even without an advisor — momentum matters.

H2: If Your School Can't Reassign an Advisor — This is the critical section. Options: (1) Wait it out (risky — could be months or years). (2) Find an informal mentor in your department (not ideal — they have no formal obligation). (3) Transfer your ABD status to a program that guarantees faculty support. Position option 3 as the most reliable.

H2: How to Transfer Your ABD Status — Explain the process: request transcripts, look for programs that accept ABD candidates and admit you directly to the dissertation phase, check how many credits they'll accept as advanced standing (up to 40 at some programs), verify they have a structured support model (not just "you'll get an advisor eventually"). Link to UBIS ABD page.

H2: What to Look for in a New Program's Faculty Support — Key criteria: rotating faculty model (not dependent on one person), faculty with availability (not overloaded), structured milestone check-ins, faculty with expertise in your specific area, clear escalation path if a mentor becomes unavailable.

H2: Don't Let This Derail Your Doctorate — Closing encouragement. Losing an advisor is a setback, not an ending. Thousands of ABD candidates face this every year. The ones who finish are the ones who take action. Soft CTA linking to UBIS ABD page.

Write with deep empathy. The reader is in a stressful situation. Be reassuring but practical. Short paragraphs. Output in clean HTML.

Article 6: Transferring International Credits to a US Masters

2,000 words · [Links to Masters page](#)

META TITLE: Transferring International Credits to a US Masters Degree (2026 Guide)

META DESCRIPTION: Have graduate credits from a university outside the US? Learn how to transfer international credits to a US-accredited masters program. Step-by-step guide.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 2,000-word blog post titled "Transferring International Credits to a US Masters Degree: A 2026 Guide."

Target keyword: international credit transfer . Secondary keywords: transfer international credits to US masters , foreign credits US degree , overseas credits transfer .

Structure:

Introduction — Many international professionals have graduate-level coursework from their home country and want to complete a US-accredited masters. The good news: it's possible. The challenge: not all US universities accept international credits. This guide explains how.

H2: Can US Universities Accept International Credits? — Yes, but policies vary widely. Some accept none. Some accept up to 50%. UBIS accepts up to 70%. The key factors: accreditation of the originating institution, grade equivalency, course relevance, and the receiving university's policy.

H2: How International Credit Evaluation Works — Explain the process: official transcripts (translated if necessary), credential evaluation service (WES, ECE, or the university's own evaluation), grade equivalency mapping (e.g., UK First Class = US A, UK 2:1 = US B+), course-by-course review for relevance. Note that UBIS applies recognized international grade equivalency standards.

H2: Which Countries' Credits Transfer Most Easily? — Cover major regions: UK (well-understood system, transfers well), Canada (very similar to US, high acceptance), Australia/New Zealand (strong acceptance), European Union (Bologna Process makes evaluation easier), India (accepted but evaluation varies), Nigeria and other African nations (accepted, may need additional documentation), Middle East (growing acceptance). Be honest — some regions face more scrutiny than others.

H2: What You'll Need to Submit — Checklist: official transcripts (sealed or verified digital), certified English translations (if applicable), degree certificate/diploma, course syllabi or descriptions (helps with relevance evaluation), credential evaluation report (if you have one from WES or similar), passport/ID for verification.

H2: Common Challenges and How to Overcome Them — Address: (1) "My university isn't well-known" — accreditation matters more than name recognition. (2) "My grades use a different scale" — equivalency mapping handles this. (3) "My courses were in a different language" — certified translations solve this. (4) "I was told my credits won't transfer" — that was one university's policy, not all. Try UBIS.

H2: Professional Experience as Credit — Many international professionals don't realize that work experience can count. UBIS offers up to 6 US graduate credits through Prior Learning Assessment for 5+ years of managerial-level experience. This stacks on top of academic credit transfer.

H2: Step-by-Step: How to Start — (1) Gather your transcripts and documents. (2) Request a free credit evaluation from UBIS. (3) Review the evaluation. (4) See how many courses remain. (5) Calculate your cost and timeline. Link to UBIS Masters landing page with anchor text like "UBIS free international credit evaluation."

H2: Frequently Asked Questions — 4-5 quick Q&As: Do I need a WES evaluation? (Not always — UBIS does its own evaluation.) How long does evaluation take? (1-2 weeks typically.) Can I transfer credits from an unaccredited international school? (Generally no — the originating institution needs recognized accreditation.) What if only some of my credits transfer? (You only pay for the remaining courses.)

Write for an international audience — avoid US-centric assumptions. Be encouraging but realistic. Use bullet points and checklists. Output in clean HTML.

Article 7: How to Transfer Doctoral Credits Between Universities

1,800 words · [Links to ABD page](#)

META TITLE: How to Transfer Doctoral Credits Between Universities (2026 Guide)

META DESCRIPTION: Want to transfer your doctoral coursework to a new university? Learn the process, limits, and how to maximize your advanced standing credits.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,800-word blog post titled "How to Transfer Doctoral Credits Between Universities."

Target keyword: `transfer doctoral credits` . Secondary keywords:

`transfer PhD credits` , `doctoral advanced standing` , `transfer DBA credits` .

Structure:

Introduction — You started a doctoral program (PhD, DBA, EdD) at one university and want to move to another. Maybe the fit was wrong, your advisor left, or life changed. Can you transfer your credits? Yes — but the process is more complex than undergraduate transfer.

H2: Can You Transfer Doctoral Credits? — Short answer: yes, but it depends. Unlike undergrad (where 60-90 credits commonly transfer), doctoral transfer is evaluated case-by-case. Most programs accept 6-15 credits. Some, like UBIS, accept up to 40 credits of advanced standing for ABD candidates.

H2: What Types of Doctoral Credits Transfer? — Break it down: (1) Coursework credits — most transferable if from an accredited institution with B or better. (2) Dissertation/research credits — rarely transfer because they're institution-specific. (3) Comprehensive exam credits — sometimes accepted as proof of competency. (4) Professional experience credits — some programs offer PLA (UBIS offers up to 6 credits for 5+ years managerial experience).

H2: The Transfer Process Step by Step — (1) Request official transcripts from your current/former school. (2) Identify target programs that accept doctoral transfer credits. (3) Submit transcripts for evaluation. (4) Receive a credit evaluation showing what transfers and what doesn't. (5) Review and ask questions. (6) Make your decision. (7) Enroll and begin.

H2: How Many Doctoral Credits Can You Transfer? — Comparison table: Traditional DBA programs (typically 6 credits / 2 courses max), Executive DBA (up to 15 credits via experience), UBIS ABD pathway (up to 40 credits advanced standing). Explain why UBIS accepts more — because it's specifically designed for ABD candidates who've already completed coursework elsewhere.

H2: ABD vs. Full Transfer — What's the Difference? — Important distinction: "Full transfer" means moving your entire program to a new school (rare for doctoral). "ABD pathway" means you're admitted directly to the dissertation phase because your coursework is already done. The ABD pathway is faster, cheaper, and more common. [Link to UBIS ABD page](#).

H2: Questions to Ask Before Transferring — Checklist: Will my credits actually transfer? (Get it in writing.) Will I have to repeat any coursework? (Should be no for ABD pathway.) Who will my advisor be? (Rotating faculty is better than one person.) How long will it take to finish? (Should be ~1 year for ABD.) What's the total cost? (Transparent per-track pricing is best.)

H2: Next Steps — Gather transcripts, request a free evaluation, compare programs. Soft CTA linking to UBIS ABD landing page.

Write in a clear, informative tone. The reader is making a significant decision — be thorough but not overwhelming. Use tables and numbered steps. Output in clean HTML.

Article 8: Complete Your MBA After Starting at Another School

1,600 words · [Links to Masters page](#)

META TITLE: How to Complete Your MBA After Starting at Another School

META DESCRIPTION: Started an MBA but didn't finish? Learn how to transfer your credits and complete your MBA at a new school. Step-by-step guide with cost and timeline.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,600-word blog post titled "How to Complete Your MBA After Starting at Another School."

Target keyword: `complete MBA started elsewhere` . Secondary keywords: `transfer MBA credits` , `finish my MBA online` , `incomplete MBA` .

Structure:

Introduction — You started an MBA program but life got in the way. Job change, family, cost, or the program wasn't the right fit. You have credits but no degree. Here's how to finish.

H2: Why People Don't Finish Their MBA — Common reasons: cost became prohibitive, program was too rigid (on-campus only), life circumstances changed, program quality was poor, lost motivation. Normalize it — you're not alone. Many MBA students start but don't finish.

H2: Your Credits Aren't Lost — Reassure the reader: the MBA courses you completed still have value. Most accredited MBA programs will accept transfer credits from other accredited MBA programs. The key is finding a program with a high transfer ceiling.

H2: How MBA Credit Transfer Works — Explain: MBA programs are typically 36-45 credits. Most schools accept 6-9 credits (2-3 courses) as transfer. UBIS accepts up to 70% — meaning on a 45-credit MBA, you could transfer up to 31 credits and only need ~5 courses. On a 36-credit MBA, up to 25 credits transfer, leaving ~4 courses.

H2: What MBA Courses Typically Transfer? — Core courses (accounting, finance, marketing, management, strategy) transfer most easily. Electives and specialization courses transfer if they match the new program's offerings. Courses older than 5-7 years may face scrutiny (but UBIS doesn't impose time limits on relevant graduate credits). Grade must be B or better.

H2: How to Choose the Right Program to Finish Your MBA — Criteria: (1) Highest transfer ceiling possible. (2) Online format for flexibility. (3) 8-week terms for speed. (4) Ability to take 3 courses concurrently. (5) Transparent pricing. (6) IACBE or equivalent accreditation. (7) Frequent intakes (don't wait 6 months to start). Link to UBIS Masters page.

H2: Timeline and Cost to Finish — Scenario table: With 70% transfer → 3-4 courses remaining → 8 weeks to 2 months → from ~\$2,700-\$3,600 out-of-pocket. With 50% transfer → 5-6 courses → 2-3 months → ~\$4,500-\$5,400. With 25% transfer → 8-9 courses → 4-6 months → ~\$7,200-\$8,100.

H2: How to Get Started — Action steps: gather your MBA transcripts, request a free credit evaluation, see exactly what transfers, calculate remaining cost, enroll. Soft CTA linking to UBIS Masters landing page.

Write with encouragement. The reader may feel shame about not finishing — remove that. Be practical and specific. Output in clean HTML.

Month 5-6: Top-of-Funnel + Credibility

Article 9: What Does ABD Mean?

1,500 words · [Links to ABD page](#)

META TITLE: What Does ABD Mean? Everything Doctoral Candidates Need to Know

META DESCRIPTION: What does ABD stand for? Learn what "All But Dissertation" means, how common it is, and what your options are if you're ABD.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,500-word blog post titled "What Does ABD Mean? Everything Doctoral Candidates Need to Know."

Target keyword: `what does ABD mean` . Secondary keywords: `ABD doctoral` , `all but dissertation` , `ABD PhD` .

Structure:

Introduction — Direct answer: ABD stands for "All But Dissertation." It's the status of a doctoral candidate who has completed all coursework, passed comprehensive exams, but has not yet completed and defended their dissertation. It's extremely common — an estimated 50-76% of doctoral candidates reach ABD status.

H2: ABD vs. PhD Candidate — What's the Difference? — Explain the terminology: in many programs, "ABD" and "doctoral candidate" are used interchangeably. Technically, "candidate" means you've passed comprehensives and are working on the dissertation. ABD is the informal term for the same status. Some people use ABD to emphasize that the dissertation is the only thing remaining.

H2: How Common Is ABD? — Statistics: approximately 50% of PhD students and up to 76% of professional doctorate (DBA, EdD) students reach ABD. Of those, only about 24-50% actually finish. This means roughly half of all people who start a doctorate never complete it. The ABD phase is the #1 point of attrition.

H2: Why Do People Get Stuck at ABD? — Cover the main reasons: isolation (dissertation work is solitary), loss of advisor, loss of funding, life events (job, family, health), perfectionism, lack of structure, the "open-ended" nature of dissertation work. Be empathetic — this is a systemic issue, not individual failure.

H2: Can You Put "ABD" on Your Resume? — Address this common question. Short answer: you can list it as "PhD (ABD)" or "Doctoral Candidate (ABD)" but it's not a degree. Some employers value it; others don't. The real value is in finishing. If you're ABD, the best career move is to complete the degree.

H2: Your Options If You're ABD — Three paths: (1) Return to your original program and finish (may be difficult if advisor is gone or program changed). (2) Transfer to a new program that accepts ABD candidates (most realistic option for many). (3) Walk away (a valid choice, but consider what you're leaving behind). Link to UBIS ABD page when discussing option 2.

H2: How to Move Forward From ABD — Actionable advice: assess where you are (what's done, what's left), gather your transcripts, research ABD-friendly programs, request credit evaluations, talk to admissions advisors, make a plan with a timeline. Soft CTA linking to UBIS ABD landing page.

This is a top-of-funnel article — many readers will be early in their research. Be educational, not salesy. Define terms clearly. Output in clean HTML.

Article 10: Is an IACBE-Accredited Degree Respected?

1,800 words · [Links to Both pages](#)

META TITLE: Is an IACBE-Accredited Degree Respected by Employers? (2026)

META DESCRIPTION: Is an IACBE-accredited degree respected? Learn what IACBE accreditation means, how it compares to AACSB, and whether employers value it.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,800-word blog post titled "Is an IACBE-Accredited Degree Respected by Employers?"

Target keyword: IACBE accredited degree respected . Secondary keywords: IACBE vs AACSB , is IACBE legitimate , IACBE accreditation employers .

Structure:

Introduction — You're considering a degree from an IACBE-accredited university (like UBIS). You've heard of AACSB but not IACBE. Is IACBE legitimate? Will employers respect it? This article gives you the honest answer.

H2: What Is IACBE Accreditation? — IACBE stands for International Accreditation Council for Business Education. It's a programmatic accreditor recognized by CHEA (Council for Higher Education Accreditation), which is the same body that recognizes AACSB and ACBSP. IACBE accredits business programs at the associate, bachelor's, master's, and doctoral levels. It's legitimate and CHEA-recognized.

H2: IACBE vs. AACSB — What's the Difference? — Honest comparison table: AACSB is older (1916), more research-focused, held by ~600 schools globally, often associated with traditional research universities. IACBE is newer (1997), more outcomes/practice-focused, held by 1,000+ programs globally, often associated with practitioner-oriented and online programs. Neither is "better" — they serve different types of institutions and students. AACSB is more recognized in academic/research circles. IACBE is equally valid for practitioner/executive careers.

H2: Do Employers Care About IACBE? — The honest answer: most employers don't know the difference between accreditors. They care about: (1) Is the school accredited by a CHEA-recognized body? (Yes, IACBE is.) (2) Is the degree from a legitimate institution? (Yes.) (3) Can you demonstrate the knowledge and skills? (That's on you.) For executive and practitioner roles, the degree opens doors — your experience and performance keep them open.

H2: When IACBE Accreditation Matters Most — Situations where it's important: employer tuition reimbursement programs (require CHEA-recognized accreditation), government positions (require accredited degrees), further education (a master's from an IACBE school is accepted for doctoral admission at most schools), international recognition (IACBE is internationally recognized, important for global professionals).

H2: When AACSB Might Matter More — Be honest: if you want a career in academic research or tenure-track faculty positions, AACSB carries more weight in those circles. If you're pursuing a practitioner/executive career (which is what DBA and MBA programs are designed for), IACBE is fully sufficient.

H2: How to Verify IACBE Accreditation — Practical steps: check the IACBE website directory (iacbe.org), verify CHEA recognition (chea.org), check the university's accreditation page, ask the university for their accreditation documentation. UBIS Global is IACBE-accredited and listed in the IACBE directory.

H2: The Bottom Line — IACBE is a legitimate, CHEA-recognized accreditation. For working professionals pursuing an MBA, DBA, or MAIR for career advancement (not academic research), it's fully respected. The degree you earn is real, accredited, and carries weight. Link to both UBIS landing pages with appropriate anchor text.

Be honest and balanced. Don't oversell IACBE — acknowledge that AACSB has more name recognition, but explain why IACBE is equally valid for the target audience. This builds trust. Output in clean HTML.

Article 11: How Much Does It Cost to Finish a Dissertation?

1,500 words · [Links to ABD page](#)

META TITLE: How Much Does It Cost to Finish a Dissertation? (2026 Breakdown)

META DESCRIPTION: How much does it cost to finish a dissertation? Get a real breakdown of dissertation completion costs, from structured programs to going back to your original school.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,500-word blog post titled "How Much Does It Cost to Finish a Dissertation?"

Target keyword: `cost to finish dissertation`. Secondary keywords: `dissertation completion cost`, `how much does a DBA cost`, `ABD program cost`.

Structure:

Introduction — You're ABD and you want to finish. But how much will it actually cost? The answer depends on your path. This article breaks down the real costs of each option so you can make an informed decision.

H2: Option 1 — Go Back to Your Original School — Cost breakdown: tuition per credit (often \$800-\$1,500/credit at traditional schools), dissertation credits needed (typically 12-24 credits), total: \$10,000-\$36,000+. Plus: you may need to pay for advisor time, committee fees, and institutional fees. Timeline: 1-3+ years. Risk: advisor may not be available, program may have changed.

H2: Option 2 — Enroll in a Full DBA Program — Cost: \$35,000-\$45,000 for a full DBA. Problem: you'd be repeating coursework you already completed. You'd pay \$35K+ for work you've already done. This is the most expensive and least efficient option for ABD candidates.

H2: Option 3 — Transfer to an ABD Completion Program — This is where the cost drops dramatically. At UBIS: 4 dissertation tracks at \$800 each = \$3,200 in track fees. Plus program and enrollment fees. Total typically under \$9,000. Timeline: ~1 year. You don't repeat any coursework. This is the most cost-effective path for most ABD candidates. [Link to UBIS ABD page](#).

H2: Cost Comparison Table — Create a clear table: Full DBA Program (\$35,000-\$45,000, 2-3 years, repeats coursework) | Return to Original School (\$10,000-\$36,000, 1-3+ years, advisor uncertainty) | UBIS ABD Pathway (under \$9,000, ~1 year, structured support, no repetition).

H2: Hidden Costs to Watch For — Warn about: application fees, transcript evaluation fees, technology fees, graduation fees, dissertation formatting/editing services, travel for defense (if required — UBIS is 100% online so no travel needed). Advise readers to ask for a complete cost breakdown before enrolling anywhere.

H2: How to Calculate Your Exact Cost — Steps: (1) Determine how many dissertation tracks/credits you need. (2) Get a credit evaluation to see what transfers. (3) Ask for a complete fee schedule (not just tuition). (4) Calculate total cost to finish. (5) Compare programs on total cost, not per-credit cost. [Link to UBIS ABD page calculator](#).

H2: Is It Worth the Investment? — Frame the ROI: a DBA can increase earning potential by 20-40% in executive roles. The cost of finishing (\$3,200-\$9,000) vs. the lifetime earnings increase makes it one of the highest-ROI investments a professional can make. But only if you actually finish — which is why choosing a structured program matters.

Be transparent with numbers. The reader is cost-sensitive — give them real figures they can use.

Article 12: Online Masters vs On-Campus for Working Professionals

1,800 words · [Links to Masters page](#)

META TITLE: Online Masters vs On-Campus: Which Is Right for Working Professionals?

META DESCRIPTION: Online masters or on-campus? Compare flexibility, cost, credibility, and completion speed for working professionals considering a graduate degree.

FULL PROMPT — COPY EVERYTHING BELOW

Write a 1,800-word blog post titled "Online Masters vs On-Campus: Which Is Right for Working Professionals?"

Target keyword: `online masters working professionals` . Secondary keywords: `online vs on-campus masters` , `is an online masters respected` , `online MBA vs on-campus MBA` .

Structure:

Introduction — You're a working professional considering a masters degree. Should you go online or on-campus? The answer has changed dramatically in the last 5 years. This article compares both options honestly across the factors that matter most to working professionals.

H2: Flexibility — Online: study on your schedule, from anywhere, while working full-time. On-campus: fixed class times, commute required, may require reducing work hours. Winner for working professionals: online, clearly.

H2: Cost — Online: no commute, no relocation, often lower tuition, can keep working (no lost income). On-campus: tuition + commuting + potential lost income from reduced hours. Include a cost comparison example: online masters from \$2,700 (with transfer) vs. on-campus MBA at \$40,000-\$80,000+. Link to UBIS Masters page for the online cost example.

H2: Speed to Completion — Online: 8-week terms, ~9 start dates per year, ability to take multiple courses concurrently. Can finish in as few as 8 weeks with maximum transfer. On-campus: traditional 16-week semesters, 2 start dates per year, often limited to 2 courses per semester. Typical completion: 1.5-2 years minimum.

H2: Credibility and Accreditation — Address the stigma: online degrees from accredited institutions are fully respected. The key is accreditation (IACBE, AACSB, regional). An online degree from an IACBE-accredited school carries the same credential as an on-campus degree from the same school. Employers increasingly don't distinguish — especially post-2020.

H2: Networking — On-campus: in-person networking, campus events, local alumni. Online: virtual cohorts, global classmates (40+ nationalities at UBIS), LinkedIn alumni networks. Honest assessment: on-campus has an edge for local networking, but online offers broader global connections. For international professionals, online networking is often more valuable.

H2: Learning Experience — On-campus: face-to-face interaction, structured environment, campus resources. Online: self-paced, digital resources, discussion forums, video lectures. For working professionals who are self-motivated, online works well. For those who need external structure, some online programs (like UBIS with its structured tracks and faculty mentorship) provide that accountability.

H2: Which Is Right for You? — Decision framework table: Choose online if you work full-time, want to finish fast, need flexibility, are self-motivated, want to minimize cost. Choose on-campus if you have time for fixed schedules, value in-person networking, want the traditional campus experience, can afford higher cost and longer timeline.

H2: The Hybrid Option — Briefly mention that some programs offer hybrid (mix of online and on-campus). For most working professionals, fully online is the best fit. Link to UBIS Masters page as an example of a fully online, accredited, fast-completion option.

Be balanced — don't dismiss on-campus entirely, but make the case that for working professionals, online is usually the better choice. Use comparison tables. Output in clean HTML.
